### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Repeated Rejections*

1. The 35 U.S.C. 103 rejection of claims 16 and 20-22 over Lupinski et al. is repeated for the reasons previously set forth in Paper #14, Pages 2-4, Paragraph #3.

### *Response to Arguments*

2. Applicant's arguments filed October 13, 2003 have been fully considered but they are not persuasive. Applicant argues that in viewing Fig. 4 of Lupinski, along with the text of col. 6, lines 7-23, and comparing this to Fig. 5 of Lupinski, "it is clear that Lupinski teaches away from a coating profile in which the coating is thicker at the ends than at the center portion. And, although Lupinski does not show a "traditional" dog-bone profile, it is submitted that the configuration of Fig. 4 is akin to such and that the teaching of Lupinski away from this profile is equally well applicable and analogous to teaching away from the claimed dog-bone profile." Examiner acknowledges that Lupinski teaches away from the claimed dog-bone profile. However, Figure 4 of Lupinski shows that it is old and well-known in the analogous art to have metal strap with a melted and cured powder coating that is thicker at the ends than at the center portion to define a dog-bone profile. Therefore, it would have been obvious to one of ordinary skill in the art at the time the applicant's invention was made to alter the shape of the melted and cured powder coating on the metal strap in Lupinski to be thicker on the ends than at the center portion to define a dog-bone profile. Furthermore, it has been held that a change in shape would be an unpatentable modification in the absence of showing unexpected results. *In re Dailey et al.*, 149 USPQ 47 CCPA 1966.

*Conclusion*

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
